Subject: Inquiry / Investigation in Non-Consequential Train Accidents.
Reference: Railway Board letter of even no. dated 12.03.2024

To prevent reoccurrence of unusual incidents, it is essential that thorough inquiry with proper root cause analysis of incident be made. Towards this Why-Why and Fish Bone analysis is being followed over IR to arrive at the actual cause of the incident.

However it is noted that most of the Railways are not enclosing proper Root cause analysis i.e. Why- Why and Fish Bone analysis along with the Inquiry Report, especially in inquiry reports of non-consequential cases.

In view of the above, it is once again advised that timely completion of inquiries and subsequent uploading of Inquiry Reports (with all relevant documents including root cause analysis) on the SIMS portal may be ensured.
